The Problem

There can be difficulty in finding a suitable peer tutor for specific courses since any information about students willing to tutor are usually split across social media platforms and word of mouth, and this can be much more troublesome depending on the courses they need tutoring for. As well, any students who are capable and willing to tutor don't really have any centralized way to advertise their availability.

Users

- Students who want to find a peer tutor that has both the qualification and availability that matches their current academic needs.
- Students who want to teach other students but do not have an easy way of reaching out to potential students

---

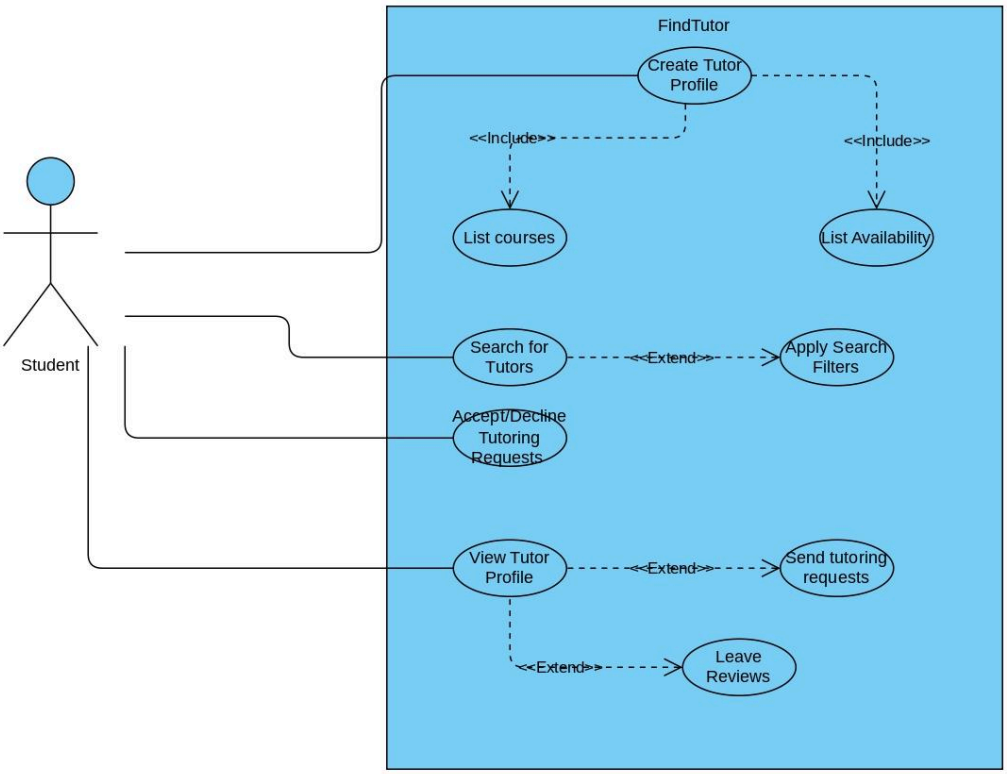

Requirements Summary

ID	Requirements	Priority
FR-1	Create a tutor profile listing courses and availability	**Must**
FR-2	Search for tutors by filtering desired courses and time	***Must - MVP***
FR-3	View tutor profile and see availability, what courses the tutor teaches, and reviews	**Must**
FR-4	Send/Receive tutoring requests	**Must**
FR-5	Leave a review	*Should*
NFR-1	When a student searches for a tutor, the search results will appear within 5 seconds on campus Wi-FI	*Should*
NFR-2	A tutoring request will be notified to tutor within 10 seconds on campus Wi-Fi	*Should*

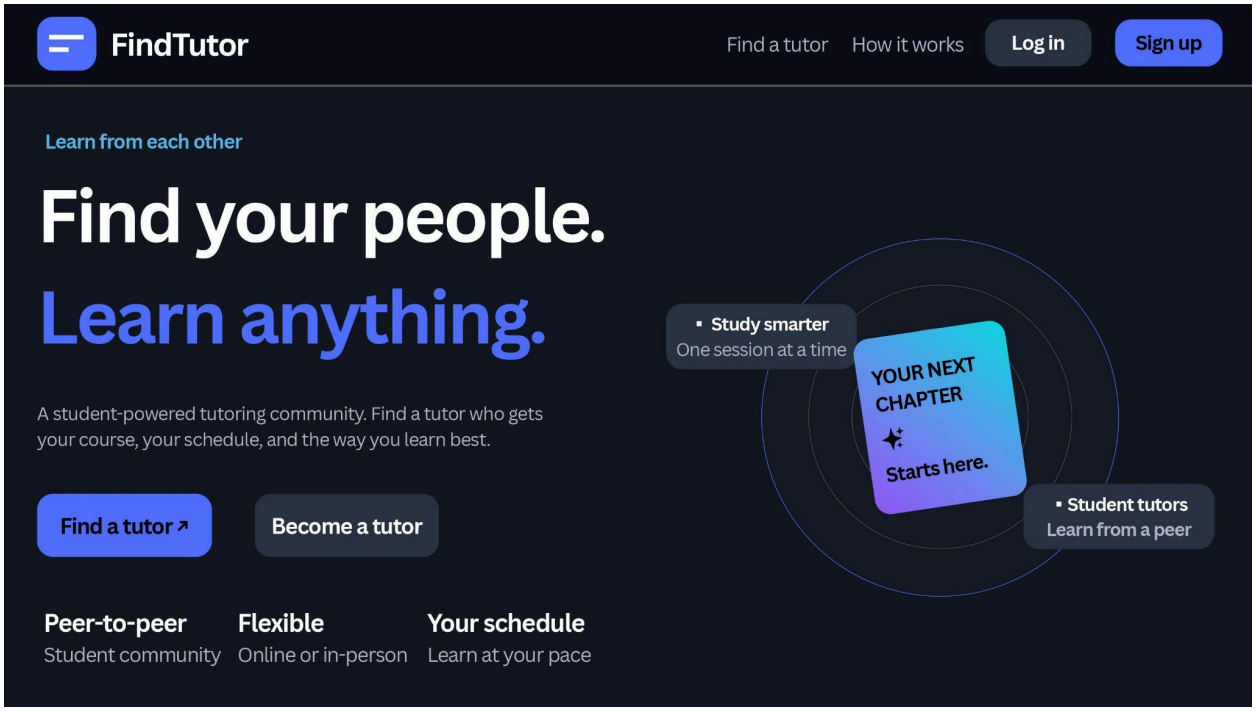

NFR-3	A new user should be able to search for a tutor based on a course in less than 3 steps upon opening the app	*Should*
NFR-4	No duplicate profile or review is created when you try to create a new profile or review	**Must**
NFR-5	When accessing a profile, user must authenticate with their password or id	**Must**

Testing

ID	Scenario	Expected	Result
(FR-1)	A tutor profile is created with valid details, courses, and availability.	The profile is created and the details are saved properly	Not tested
(FR-1)	Tutor attempts to create a profile without any courses	The tutor is prompted to select at least one courses, and the profile is not created	Not tested
(FR-1)	Tutor creates a profile with multiple courses	The profile is created and all courses that the	Not tested

		tutor selected can be seen	
(FR-1)	Tutor creates a profile without adding/ listing any availability or time slots	The system will assume the tutor is available for everyday and will create a tutor profile with every single day listing them as available	Not tested
(FR-1)	Tutor edits their profile	The profile will be updated accordingly and no duplicate profile will be created	Not tested
(FR-2)	Student searches for Tutor with the listed course: Mathematics	Tutor with Mathematics listed will be shown to the student while those without will be hidden	Not tested
(FR-2)	Student searches for a tutor who is available during: Monday	Tutor with Monday available will be shown while those who do not will be hidden	Not tested
(FR-2)	Student searches for tutor with the listed courses: Mathematics,	Tutor with Monday available and	Not tested

	and is available during: Monday	Mathematics listed in their profile will be shown while those that do not match these criteria will not be shown	
(FR-2)	Student searches for courses and availability with no matching tutors	'No tutors were found' will be displayed and no tutor profiles will be seen by the student	Not tested
(FR-2)	Student clears the search filters	The search results will be updated to reflect the current criterias	Not tested
(FR-3)	Student open a tutor profile	The profile will be displayed along with the details the tutor has listed	Not tested
(FR-3)	Student views a tutor profile with reviews	The reviews will be displayed to the student	Not tested
(FR-3)	Student views a tutor profile with no reviews	No reviews will be displayed to the student	Not tested
(FR-4)	Student sends a tutoring request	The request is created and will	Not tested

		be sent upon the student's confirmation	
(FR-4)	The tutor receives the request	The tutoring request will be sent to the tutor and the student can not send another request	Not tested
(FR-4)	The tutor accepts the request	The student will be notified that the request is accepted, they will be able to contact the tutor and they cannot send another request	Not tested
(FR-4)	The tutor declines the request	The student will be notified that the request is declined and the student will not be able to send another request for the next 5 minutes	Not tested
(FR-4)	The student attempts to send another request to the tutor	The request will not be sent and the student will be notified of this	Not tested
(FR-4)	The student attempts to send another request	The request will not be sent and	Not tested

	after being declined but 5 minutes have not passed	the student will be notified of this and the remaining time until they can send another request	
(FR-5)	Eligible student submits a valid review	The review is saved and displayed on the profile	Not tested
(FR-5)	Student attempts to submit a review without writing anything down	The review is not submitted and the student is prompted to complete it	Not tested
(FR-5)	Student attempts to submit a review to the same tutor	A duplicate review will be created	Not tested
(FR-5)	An ineligible student attempts to write a review	A message will be displayed to the student that they will not be able to write a review	Not tested
(FR-5)	The student views the profile after writing the review	The review will be seen by the student	Not tested

---

AI-First Reflection

In this project, we used: ChatGPT.
We first used ChatGPT to help create our first project: BusBuddy, however we had to change to a different project due to the fact we did not understand the problem and it was shallow at best. ChatGPT was also used to correct any grammar mistakes and fix wordings to sound much more professional. AI was also used in the layout for UI/UX to help us design the UI to place the FRs where the user can easily spot it and won't be confused when navigating our website. ChatGPT was also in the Golden Thread Table for the design and implementation section to explain the definition of both of these.

Golden Thread Table

Problem	Requirement	Design	Implementation	Test scenario/Acceptance criteria
Students have trouble in finding a peer tutor	FR-2	Screen search + filters wireframe	Search function + course and time filter	Students will only see tutors who have the matching courses and time listed in their profile ❌
Tutors need a way to reach out to other students and advertise their services	FR-1	Profile creation overlay	Create profile + save tutor details	Create profile with courses and availability + profile is saved and displayed correctly ❌
Students need a way to know if the tutor is qualified or not	FR-3	Courses, availability data model + review overlay	Profile page displayed detailing listed courses, availability, and reviews	Open profile → The details listed by the tutor (Courses and availability) + Reviews will be displayed❌
Students want a way to request a tutoring session from a tutor	FR-4	Tutoring request overlay + request status flow	Send request + receive and respond to requests	Students send request → Tutor receives the request and can accept or decline it❌
Students need a way to share feedback about tutors	FR-5	Review submission overlay	Review form + save/display functionality	Submit review → review appears on tutor profile ❌
